

Shelf-Life Statement

To Whom it May Concern,

As an accommodation to our valued customers, Greenwood Associates Inc. and its affiliates Florida Bulk Sales, LLC and Chicago Processed Fruit Group, LLC (“Companies”) is providing this statement communicating the Companies’ shelf-life policy and guarantee.

"Shelf life" is the average time, documented as number of days, during which material properties can be expected to remain within the limits set by applicable specification under recommended storage and handling conditions, and assuming no material or packaging tampering.

Recommended shelf-life options (per storage conditions) are based on the material’s date of manufacture and documented in applicable item specifications. The actual manufacturing date is indicated on the CoA and/or marked on each container.

The Companies’ shelf-life guarantee is not applicable after expiration of the minimum shelf life, or in situations where the material may have been tampered with or stored improperly. Customers are advised to evaluate the material for conformity with specifications and suitability for the intended use.

Best Regards,

André Molina
