

Food Contact Packaging & Equipment Statement

Our organization confirms that all food contact equipment and packaging used are food-grade and compliant with all applicable United States laws and FDA regulations, including 21 CFR Parts 174–179.

All polyethylene packaging is free from Bisphenol A (BPA), melamine, cyanuric acid, acrylonitrile, vinyl chloride monomer, per- and polyfluoroalkyl substances (PFAS), and phthalates, including DINP.

This statement is based on current supplier documentation, internal audits, and regulatory review procedures. We maintain traceability and recall readiness for all food contact packaging materials and ensure ongoing compliance with FDA regulations and industry best practices.
