

Food Fraud Statement

Ensuring the quality of our products is extremely important to us. To that end, our organization employs a variety of policies and protections, including but not limited to the following:

1. A Supply Chain Program is in place which assures all products imported to the USA come from suppliers compliant with the Juice HACCP regulations (21 CFR part 120.)
2. Our Food Safety Team assesses and addresses adulteration vulnerabilities within our facilities.
3. The organization regularly reviews FDA Alerts regarding food fraud along with other relevant publications.

In the event that product adulteration is brought to the attention of the organization, the event will be reported to the proper federal authorities in parallel with our own internal investigation and product recall.

Robert Bundy
FSQA and Regulatory Manager
