

Foreign Material Statement

Greenwood Associates Inc. ("GAI") and its affiliate Chicago Processed Fruit Group ("CPFG"), agree that foreign material exclusion is a top priority of our food safety compliance system.

All products manufactured by CPFG in our Niles, Illinois facility are filtered through a mesh screen and rare-earth magnet, preventing unwanted foreign material contamination. Additional preventive measures include GFSI Pre-Requisite Programs (PRPs), a Glass and Brittle Plastic Control Program, a fully implemented cleaning and sanitation schedule, and Good Manufacturing Practices (GMPs).

Materials traded by GAI without handling by CPFG are manufactured by suppliers in full compliance with GFSI standards or our equivalent Supply Chain Program requirements, further minimizing the risk of foreign material contamination.
