

## Non-GMO / Bioengineered Declaration

Greenwood Associates Inc. ("Greenwood"), an importer, manufacturer, and distributor of food ingredients, issues this Declaration with respect to all products traded or manufactured by Greenwood.

Greenwood certifies that none of the products covered by this Declaration are genetically engineered or modified, and that none qualify as a bioengineered food as defined under 7 C.F.R. §66 of the USDA National Bioengineered Food Disclosure Standard. This Declaration is provided to support customers' compliance documentation obligations under Part 66 and related supply chain disclosure frameworks. This Declaration is based on supplier attestations obtained by Greenwood in the normal course of procurement.

All products covered by this Declaration also adhere to the requirements of EC 1829/2003 (on genetically modified food and feed) and EC 1830/2003 (concerning the traceability and labeling of genetically modified organisms).

For purposes of this Declaration, "Genetically Engineered or Modified" means all organisms and products thereof produced through techniques of genetic engineering and modification, including but not restricted to recombinant DNA, cell fusion, encapsulation, macro and microinjection, gene deletion or magnification, and other techniques for altering the genetic composition of living organisms in ways, or with results, that do not occur in nature through mating or through traditional breeding techniques such as conjugation, hybridization, or transduction. This definition encompasses and exceeds the definition of "bioengineered food" under 7 C.F.R. §66.1, which is limited to modifications achieved through *in vitro* recombinant DNA techniques that could not otherwise be obtained through conventional breeding or found in nature.
